ABOUT ME

A highly analytical Cybersecurity Researcher and Pentester with a strong background in web security and offensive hacker behavior. As a owner of the BLACK V security team, I specialize in identifying vulnerabilities and developing custom automation tools using Python and JavaScript. My studies in the Law of Evidence have equipped me with unique logical reasoning and forensic auditing skills. I am passionate about researching LLMs, managing complex virtualization environments, and building secure-by-design applications

EDUCATION

Student in Al-Azhar University

Developed strong analytical and logical reasoning skills through the study of the Law of Evidence, essential for digital forensics and security auditing.

WORK EXPERIENCE

Cybersecurity Researcher | 2024 - 2026

- Conducting web penetration testing and analyzing offensive hacker behavior.
- Collaborating within the BLACK V security group to identify vulnerabilities and document technical writeups.
- Developing custom automation tools for security research and data gathering.

Pentester & Developer | Front-End , Python

- Engineered a JavaScript-based vulnerable web laboratory to research OWASP Top 10 exploitation and mitigation.
 - Configured and managed local virtualization environments (Windows & Linux) for Active Directory security testing.
 - Implemented hardware-accelerated cryptographic research .
-

SKILLS

- | | | |
|---------------------------|-----------------------------|--------------------|
| • Security | • Operating Systems | • Programming |
| Web Pentesting, | Kali Linux, Parrot Security | Python , JS , Bash |
| Vulnerability Assessment, | Windows | |
| OSINT | | |
